

Name: \_\_\_\_\_

You are spending the day in the park, and you notice these two trees with the grass below them.

1. Does this scene raise any questions in your mind?
2. Why do you think there might be these differences you see?
3. How might you test your idea?

Now, put your idea into a formal experimental design (don't worry too much about the details):

Hypothesis:

Variable(s) you will measure:

Factor(s) (independent variable(s)):
